DESCRIPTION

The cell storage system is specifically designed for use in healthcare environments. This high-quality logistic system is standardized and suitable for use across all hospital departments. Its adaptable, modular components allow customers to configure an optimal solution tailored to their specific needs while saving up to 30% of space compared with traditional shelving systems.

The system is available with multiple locking options, including a keyed lock, electronic keypad, or electronic keypad with proximity card reader (two frequencies).

The cart features four locking swivel casters for effortless mobility and is constructed of powder-coated steel to support efficient cleaning. Two integrated side handles provide added ease of maneuverability.

- Available height 76"
- Key lock options
- Tempered-glass doors

MCT200-XX-S2D

KEY BENEFITS
